

FCSCC Small Sign Setup – August 2018

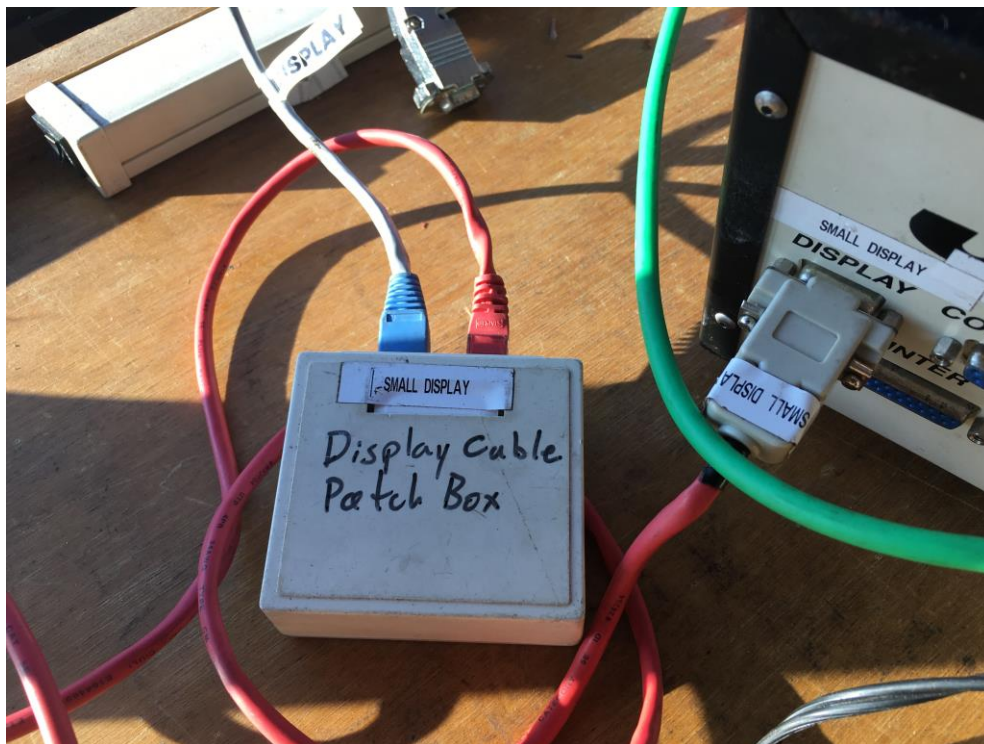

The Small Sign needs

- 1) Small sign :->
- 2) Power Adapter – stored with the sign
 - a. Plugs into orange extension cord
 - b. The small barrel plug then screws into the bottom of the sign. There are two places that it looks like it can screw into it fits in the correct one and does not fit in the wrong one
- 3) Spool with Orange extension cord
 - a. The spool stays by the sign and the plug end goes to the generator.
 - b. Unspool the cable to the generator before plugging in the power adapter for the sign.
- 4) Spool with Ethernet cable Jack on one end and plug on the other
 - a. The spool stays at the sign and the cable end with the jack gets fed into the small window in the van above the bench.
 - b. Unspool the cable to the van before plugging in the sign.
- 5) Short Ethernet Cable
 - a. Stored with the sign
 - b. Plugs into the jack on the back of the sign and the jack on the spool
 - c. Unspool the cable to the van before plugging in the sign.

At the van end the Ethernet cable plugs into the little white box

When you plug in the sign it will lite up and run thru a display test. At the end of the test it will say Ready and then go blank.
